

# LABORATORY GLASS

## Our company

**Sklárny Moravia located in Úsobrno has been a traditional Czech glass producer since 1827.**

Today's product portfolio contains:

- Bottles for distillates, wine or water
- Wide neck jars for food or cosmetics
- Laboratory glass – reagent bottles, powder bottles, burette bottles

Our colour portfolio consists of **flint, extra flint, amber and black glass.**

In case of big volumes request, there is also possibility of production in other colours than mentioned above.

The volume of containers can be from 50ml to 2500ml with maximum height 380mm.

The **focus** of the company philosophy is orientation on customer, while first of all we emphasize the satisfaction of their **needs** and **requirements**. We specialize in the production of bottles and glasses of **original shapes** according to the customer's wishes in series starting from 20,000 pcs.

Our offer also includes a wide range of services – we provide **new design, drawings, packaging** according to requirements and others. If the customer is not interested in investing in molds, we are able to provide standard models.
